

Phospho-Doublecortin (Ser297) Ab

Cat.#: AF2338 Concn.: 1mg/ml Mol.Wt.: 45kDa Size: 100ul,200ul Source: Rabbit Clonality: Polyclonal

Application: WB 1:500-1:2000, IHC 1:50-1:200

Reactivity: Human, Mouse, Rat

Purification: The Ab is from purified rabbit serum by affinity purification

via sequential chromatography on phospho- and non-

phospho-peptide affinity columns.

Specificity: Phospho-Doublecortin (Ser297) Ab detects endogenous

levels of Doublecortin.

Immunogen: A synthesized peptide derived from human Doublecortin

around the phosphorylation site of Ser297.

Uniprot: 043602

Subcellular Location: Cytoplasm.

Tissue Specificity: Highly expressed in neuronal cells of fetal brain (in the

majority of cells of the cortical plate, intermediate zone and ventricular zone), but not expressed in other fetal tissues. In the adult, highly expressed in the brain frontal lobe, but very low expression in other regions of brain, and not detected in heart, placenta, lung, liver, skeletal muscles, kidney and

pancreas.

Storage Condition and

Buffer:

Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol. Store at -20

°C.Stable for 12 months from date of receipt.

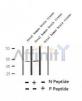

Western blot analysis of extracts from fetal human brain tissue, using Phospho-Doublecortin (Ser297) Ab. Lane1 was treated with phospho-blocking peptide, Lane2 was treated with non-phospho-blocking peptide.

Western blot analysis of extracts from fetal human brain tissue, using Phospho-Doublecortin (Ser297) Ab.

AF2338 at 1/100 staining Human thyroid cancer tissue by IHC-P. The sample was formaldehyde fixed and a heat mediated antigen retrieval step in citrate buffer was performed. The sample was then blocked and incubated with the Ab for 1.5 hours at 22°C. An HRP conjugated goat anti-rabbit Ab was used as the secondary.

<code>IMPORTANT:</code> For western blot, incubate membrane with diluted primary Ab in 5% w/v milk , 1% TBS, 0.1% Tween®20 at 4°C with gentle shaking, overnight.
