

EXPellPLUS

LOW RETENTION TIPS

Thanks to the unique composition of the plastic polymer, **CAPP's** premium **EXPellPlus** low retention pipette tips have an ultra-smooth inner surface, minimizing any sample binding. The polymer composition along with the high quality Swiss molds, on which the tips are manufactured, enables **CAPP** to obtain the low retention properties without the use of any surface additives.

EXPellPlus low retention tips are ideal for pipetting viscous samples, which are normally difficult to dispense in full. Samples such as plasma, enzymes, foaming liquids, detergents, TRIS or BSA can be handled comfortably and without any waste with **CAPP** low retention tips. Additionally, **EXPellPlus** low retention tips can significantly reduce the waste of expensive reagents.

EXPellPlus low retention tips are the perfect choice for volumes below 1mL and help to improve the accuracy and

reproducibility of pipetting results. Even the smallest amount of liquid remaining in the tip after dispensing can have a negative impact on the pipetting results. **CAPP EXPellPlus** low retention tips are manufactured in a clean-room facility and are all RNase, DNase and Pyrogen free certified and sterile.

Below picture shows a comparison of the liquid remaining after dispensing in a standard tip and in an **EXPellPlus** low retention tip. **EXPellPlus** low retention tips are universally compatible with the majority of other pipette brands.
