

384-WELL PCR PLATES

CAPP EXpell 384-well PCR plates are the ideal choice for PCR applications, thanks to their unique PP composition, their rigid form as well as the universal compatibility with basically all standard 384-well cyclers and many 384-well block (q)PCR cycler models.

The ultra thin walls of **EXpell 384-well PCR plates** are specially treated to minimize the binding of proteins.

CAPP plates are DNA, DNase, RNA, RNase and Pyrogen free certified and autoclavable. They feature an extremely low evaporation grade of less than 3%, enabling processing PCR volumes as small as 5µL. **CAPP** provides the optical adhesives (Cat. No. 5100400C) ensuring the most optimal closure of **EXpell 384-well PCR plates**.
