

## TNT Buffer

<u>Product Name</u>	<u>Product Code</u>	<u>Kit Packing</u>
TNT Buffer	ML105-100ML	100 ml
	ML105-500ML	500 ml

**Introduction:** TNT Buffer is widely used in molecular biology. It is a mixture of Tris-Cl, Sodium chloride and Tween-20<sup>®</sup>. This solution is a sterile-filtered, pre-mixed solution. The relatively high salt concentration makes this buffer particularly well-suited for immunohistochemical staining methods that require very thorough washing and for several *in situ* hybridization procedures.

**Application:** TNT Buffer is used as a wash solution during Western blotting and several other immunological procedures.

**Composition:** TNT Buffer is composed of 0.1M Tris-Cl (pH 7.5), 0.15M Sodium chloride and 0.05% Tween 20<sup>®</sup>.

**Properties:**

Appearance	:	Colorless solution
Clarity	:	Clear and free of particles
DNase & RNase	:	None detected
Bioburden	:	None detected
Suitability Test	:	This reagent has been tested and is suitable for use in various molecular biology applications.

**Storage conditions:** TNT Buffer has to be stored at 15 - 25°C.

### Technical Assistance

At HiMedia we pride ourselves on the quality and availability of our technical support. For any kind of technical assistance, mail at [mb@himedialabs.com](mailto:mb@himedialabs.com).
